DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement (IDS) submitted on March 15, 2004, was filed and the submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner. However, some of the listed patent has been crossed out and not considered because they are not closely related to the application.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-4,6-8, and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Szillage (2,728,598).

Szillage (2,728,598) discloses a shovel and method comprising a blade (20,22) having a leading edge to contact the surface or debris, a main handle (26), and a pivot member (50), which can be considered as an auxiliary handle attached to the blade near the leading edge (particularly the upper leading edge).

Re claims 2,3,6, and 7, Szillage's shovel (2,728,598) also shows the auxiliary handle having a u-shaped wherein the auxiliary handle having a central stem member (94) (see Fig. 4), a first horizontal member (middle), two diagonal struts (52,54), and two side members extending from the struts which being pivotally attached to side lugs ((Fig. 4).

Art Unit: 3652

4. Claims 1-4,6-8, and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Herzfeld et al. (6,254,154).

Herzfeld et al. (6,254,154) discloses a shovel and method comprising a blade (18,32) having a leading edge to contact the surface or debris, a main handle (12), and a pivot auxiliary handle (22,26,42,38) being attached to the blade near the leading edge (particularly the upper leading edge). The reference further shows a u-shaped member (28,28).

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 5 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Szillage (2,728,598) or Herzfeld et al. (6,254,154) in view of Kegan, Sr. (6,203,081).

Szillage (2,728,598) or Herzfeld et al. (6,254,154), as presented in sections 3 and 4 above, does not show a *secondary horizontal member or a cross bar*. However, Kegan, Sr. (6,203,081) shows a *secondary horizontal member or a cross bar* (33) to strengthen a U-shaped member. Accordingly, it would have been an obvious to one of the ordinary skill in the art at the time the invention was made to provide a *secondary horizontal member or a cross bar* on the U-shape member of Szillage (2,728,598) or Herzfeld et al. (6,254,154) as taught by Kegan Sr. (6,203,081) providing a stronger and stiffer blade.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
